ESSENTIAL OILS

Company Profile

Esperis S.p.A. was founded in 1922 by Dr. Adriano Fayaud, graduated in Pharmacy at Sorbonne University in Paris.

Still young, he moved to Italy and, from the start, dedicated particular care to the study of the officinalis plants and of vegetable extracts. His interest on the subject induced him to open several distilleries all over Italy for the distillation of the local essential oils, typical of the various regions (in Pancalieri - Piedmont - for Basil, Tarragon, Mint and Chamomile Oils; in San Lorenzo al Mare - Liguria - for Rosemary, Lavender and Lavandin Oils; in Avola - Sicily - for Citrus Oils).

At present Esperis is working in the field of the manufacturing and trading of essential oils and raw materials for cosmetic and pharmaceutical use, with the main aim of following the new market trends and, above all, of fulfilling the customers' needs. Thanks to this, Esperis has been successfully cooperating with the most well-known Italian and foreign companies for longer than 90 years now.

Esperis has been dedicating particular care to the research of natural and vegetable raw materials; indeed, at present we can offer a wide range of vegetable oils, extracts, essential oils and concentrated juices of tested good quality.

Esperis offers technical support, formulation expertise and product solutions. All employees are dedicated to understanding and anticipating customer needs. Our job is to support each other and to supply cosmetic ingredients to the customer.

Mission

"The history of man is joined with natural resources that he has learned to know: raw materials and active ingredients have been used for health and wellness.

Our history begins in 1922 and involves us all along with devotion and passion to provide the cosmetic and dermopharmaceutical industries with the extraordinary resources offered by nature, ensuring products excellence".

Pierre Rossi
 Chairman Manager Director
